

## **Progress Presentation Guidelines –2022 – Semester II(June Batch)**

- Progress evaluation will be conducted as given in the schedule
- Each group has to demonstrate the work that you have done within the allocated time
  - Product Demonstration – maximum 40 minutes
  - Q&A – 20 minutes
- Each member should complete **75%** of their component with sufficient scope.
  - You need to show that the user expectation is met in terms of functionality.
  - The main GUIs (Interfaces) should be completed. This includes the appropriate controls, navigation, user friendliness and interface logic
  - Form validations
  - Demonstrate that a user can perform at least three of the following operations-Insert, Update, Search and Delete
  - Evidence to show that individual components are integrated with other members' components
- All the members should participate for the demonstration
- Absent members will get zero marks.
- Each member should demonstrate his/her respective function.
- All the groups should be available online, 10 minutes before the allocated time.

**Submission:** Select two main interfaces (screenshots) of your product done by each team member and add to the template given. Submit a pdf of the document to courseweb on the day of the presentation
